

Flexible and cost effective access

**Zarafa Height Solutions** have extensive experience in the Suspended Access equipment market offering a range of solutions to overcome access problems on bridges.

Using market leading equipment, we can provide flexible access systems to cover many parts of a bridge. In addition to standard platforms, our engineering team work closely with leading manufacturers to design bespoke systems in line with customer requirements.

Suspended access cradles allow the user to perform key inspection, maintenance and repair tasks efficiently and cost effectively, with minimal disruption to the surroundings.

### Suspended Access

- ▶ Cost effective
- ▶ Flexible
- ▶ Proven
- ▶ Safe
