

Temporary access solutions

Zarafa Height Solutions have extensive experience in the Suspended Access equipment market offering a range of solutions to overcome access problems.

Modular suspended access platforms provide a cost effective, flexible, proven and safe alternative to other methods of access. Set up and removal is fast. Special platform configurations offer a versatile system for access to many parts of a building. There is minimal disruption to the building surroundings and no fixings are needed into the building fabric.

Our engineering team work closely with leading manufacturers to design bespoke access systems to meet customer specific requirements.

Suspended Access applications

- ▶ High rise building maintenance
- ▶ Inspection & repair work
- ▶ Cladding & curtain wall
- ▶ Concrete repairs
- ▶ Insulation
- ▶ Sign fitting
- ▶ Structural steel erection
- ▶ Painting
- ▶ Window replacement
