

## Inspection, maintenance & repair of ships

**Zarafa Height Solutions** have extensive experience in the Suspended Access equipment market offering a range of solutions to overcome access problems in the shipping industry.

Using market leading equipment, we can provide flexible access systems. In addition to standard platforms, our engineering team work closely with leading manufacturers to design bespoke systems in line with customer requirements.

Suspended access cradles allow the user to perform inspection and maintenance tasks internally and externally (e.g. hull blasting, cleaning, painting, ballast tank work).

### Suspended Access

- ▶ Cost effective
- ▶ Flexible
- ▶ Proven
- ▶ Safe
